# INTRODUCTION

HMRC has introduced a new initiative 'Making Tax Digital' (MTD) for VAT returns that started in April 2019. The initiative aims to make tax administration more effective, efficient and easier through the implementation of a fully digital tax system. The following government link provides more information on this:

<https://www.gov.uk/government/publications/making-tax-digital/overview-of-making-tax-digital>

The initial requirement is to deliver the summary VAT return via the HMRC gateway, and this can only be done via software, not through manual data entry as is currently available. Future HMRC VAT returns requirements will then include delivering all the VAT transactions via the same method.

Consequently, Access is introducing a new facility to enable customers to comply with the new and any future related legislation. To this end, Access has enhanced their existing **Access Workspace** solution, which is a generic web portal that Access currently provide for user access to all their cloud-based solutions. This now supports user login to upload the VAT Returns.

**Access Workspace** has been developed to retrieve the values directly from the Dimensions VAT Register. This requires the additional installation of **Access Connect** to link with your Dimensions and allow the data to pull through automatically.

## PRE-REQUISITES

The following pre-requisites are required in order to install Access Connect to retrieve VAT figures automatically from Access Dimensions:

1. Dimensions must be on v2.51a or above.
2. Logon as a user with admin credentials for installation.
3. The server will need at least .NET Framework 4.6.2 or later.
4. The Access Connect windows service under an account with admin credentials, which has access rights to the SQL server

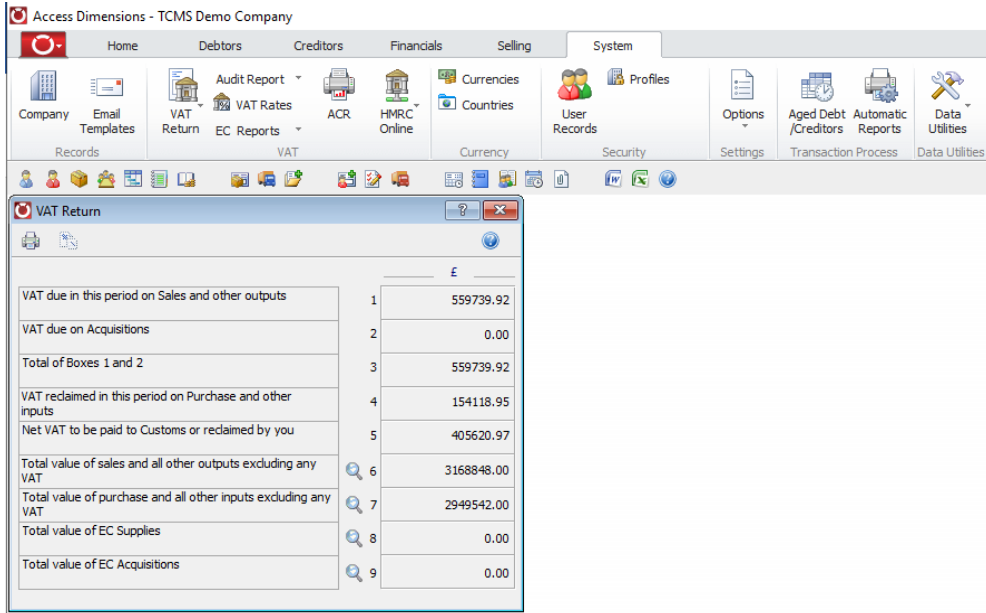

## USING DIMENSIONS WITH ACCESS DIGITAL TAX

Please see below for a summary of the steps that need to be followed for using Access Dimensions directly linked with Access Digital Tax for MTD returns:

- Access Digital Tax automatically pulls VAT Data (the 9 fields) from Dimensions.
- It uses the dates from HMRC to run the normal calculation within Dimensions.
- If Dimensions is set to calculate VAT by periods, the calculation will include all transactions up to the period that relates to the end date from HMRC.
- **IMPORTANT if calculating VAT by periods, your period dates in Dimensions must match the dates set on your HMRC VAT Account**
- At the point of submitting, a final check is done to see if any changes have happened in Dimensions. If the VAT figures have changed, the user is warned and submission paused.
- Once VAT data is successfully submitted to HMRC, Access Digital Tax will automatically mark transactions as submitted within Dimensions.
- No need to mark transactions as submitted within Dimensions - the ability to do this is removed when Access Connect is installed.

# Dimensions VAT Return

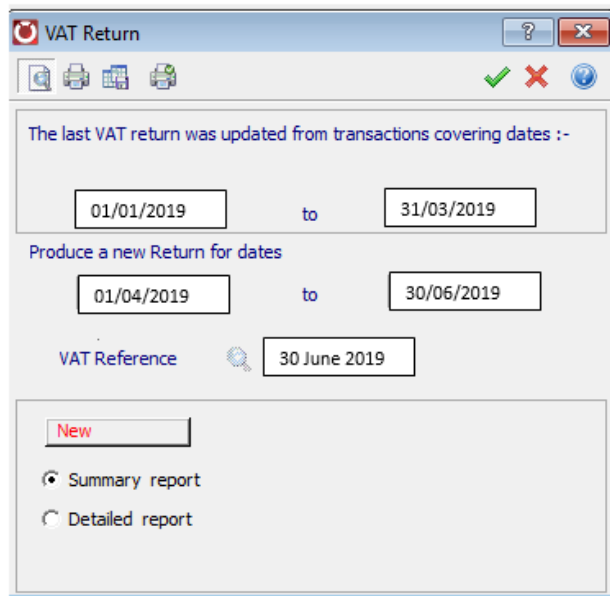

1. Click on the *VAT Return* option available from the *System* menu:

2. The above window displays the VAT figures as per the last update of the VAT return. To print the VAT Return, click the Print icon at the top of the screen.

3. The following screen is displayed – select the output for the VAT Return (i.e. print to screen or send to printer or file) and click on the Green tick

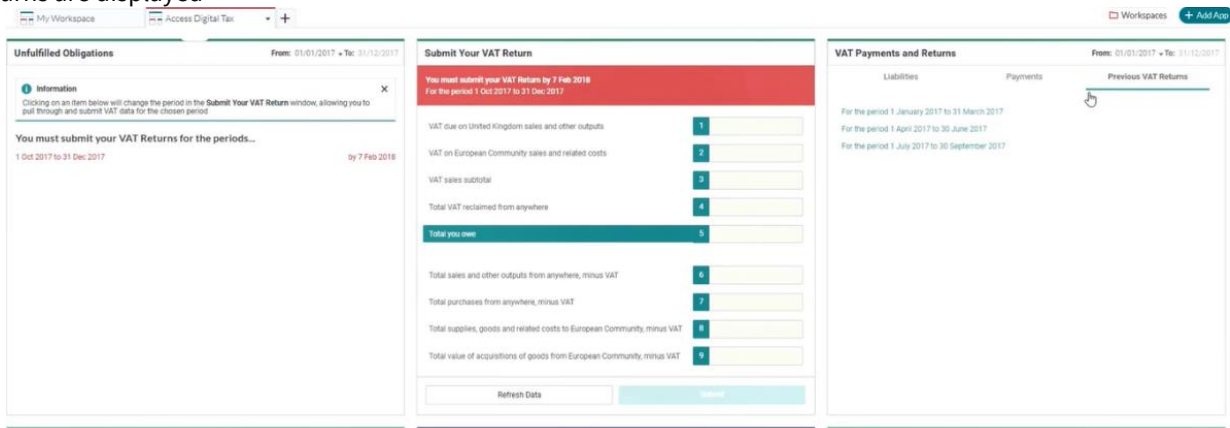

- Once the VAT return has been printed the steps in Access Dimensions are complete. The ability to mark transactions as submitted following the printing of the VAT Report has been removed with the installation of Access Connect.

# Submitting VAT Return from the Access Workspace

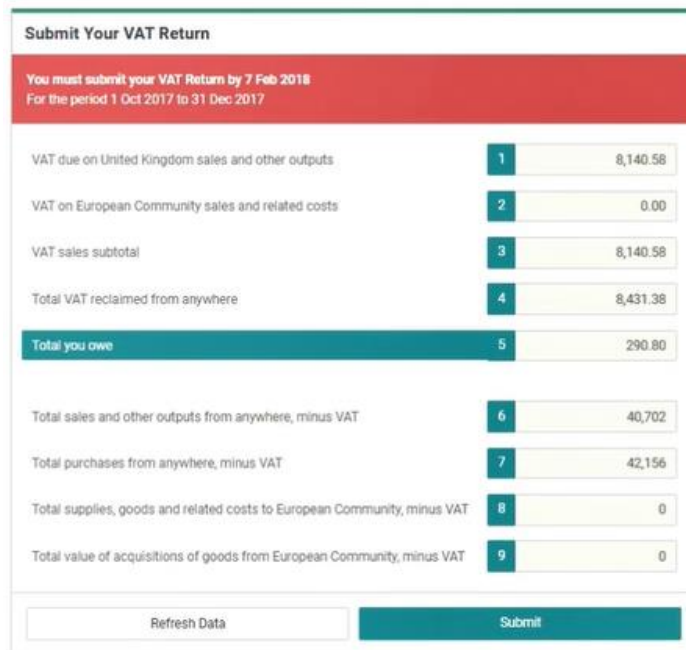

1. Log on to the Access Workspace with the user credentials provided: go.accesscloud.com
2. From the Products Grid, select the *Digital Tax* option. If more than one company exist in Access Dimensions they will be available for selection from a drop-down menu from the 'Digital Tax' option

3. From the below screen you will be presented with which VAT Returns need to be submitted on the left-hand side. The middle section will display the figures for the VAT return due and on the right payments, liabilities and previous VAT returns are displayed

4. Click on *Refresh data* to retrieve the VAT Return figures from Dimensions. Verify the figures against the VAT report printed from Dimensions.

- Click on *Submit* to send the data to HMRC. You will be presented with the following message:

**Submit Your VAT Return**

You must submit your VAT Return by 7 Feb 2018  
For the period 1 Oct 2017 to 31 Dec 2017

VAT due on United Kingdom sales and other outputs	<b>1</b>	8,140.58
VAT on European Community sales and related costs	<b>2</b>	0.00
VAT sales subtotal	<b>3</b>	8,140.58
Total VAT reclaimed from anywhere	<b>4</b>	8,431.38
<b>Total you owe</b>	<b>5</b>	<b>290.80</b>

**Submit your VAT Return** ✕

You are about to submit the above VAT return for the period **1 Oct 2017 to 31 Dec 2017**, which is based upon data taken directly from your **Upload File (ADT3)** database. When you submit the above information you are making a legal declaration that the information is true and complete. A false declaration can result in prosecution.

I declare that the information given above is true and complete  
Date of submission **26 Nov 2018**

- Tick the declaration box and then on *Submit* to continue.
- Once submitted successfully the following message from HMRC will be displayed:

**Submit Your VAT Return** ✕

**VAT Return Submitted**

Your VAT Return for the period 1 Oct 2017 to 31 Dec 2017 was successfully submitted. You will now be able to view this submission under Your Previous VAT Returns and you will be able to commence payments against your VAT bill for this period within your Business Tax Account. Remember, there are many ways you can fulfil your tax liability, and you don't need to wait to pay your tax bill in one lump sum. Keep track of your liability and spread the cost by making payments early.

## TROUBLESHOOTING

Access Digital Tax runs the same calculation / code as when using Dimensions. The following are the only reasons the figures can be different:

- Changes have been made in Dimensions since the last time the VAT Data was refreshed in Access Digital Tax.
- A different date or period range is being used within Dimensions to the date range sent by HMRC. If Dimensions set to calculate VAT by dates, please check that the dates being entered within Dimensions match those requested by HMRC. Access Digital Tax will always use the correct dates. If Dimensions set to calculate VAT by periods, please check that the Periods in Dimensions match the setup on your HMRC VAT Account and you have entered the correct period range in Dimensions
- The data you are viewing in Dimensions is for different legal entities (VAT Groups and Sub Ledgers), to those selected in Access Digital Tax

TEAM Software develops market-leading solutions for companies with distributed workforces. TEAM has a focus on the cleaning and security industries helping the companies who serve these sectors manage and optimise their business; from front line service delivery to back office financial management. TEAM's technology is designed to help improve productivity, employee engagement and profitability, and at the same time help control cost, risk and compliance.
